The Panelling Centre

The kitchen is the heart of the home, a room for entertaining guests, preparing delicious meals and spending quality time together with family and friends. The kitchen is an integral part of everyday life and it is important that the design features and elements you choose are a reflection of your personality and taste.

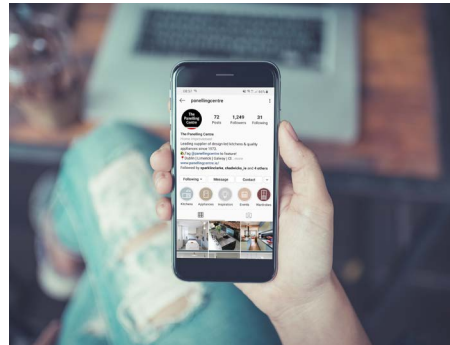

At The Panelling Centre, we've been supplying kitchens to home renovators and trade professionals since 1973. With decades of experience, we understand that the kitchen is the most used area of the home and it's important that your kitchen works for you.

We aim to present our customers with a catalogue of kitchen excellence, from traditional to contemporary door designs, to handles, flooring and accessories. We carry an extensive and versatile selection of products that can shape any kitchen into a stylish, comfortable and functional interior space, that will suit any budget.

Here at The Panelling Centre we want to make your dream kitchen a reality. To find out more about our products and services, contact your local tradesperson or book an appointment online to speak to one of our team members.

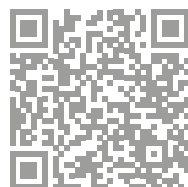

A guide to planning your new kitchen

INSPIRATION

After you have gathered all your design ideas, we recommend taking some time to visit your nearest showroom and experience the kitchen displays in person. From kitchen accessories, to flooring and appliances, we carry everything under one roof to create your dream kitchen.

TALK TO OUR TEAM

Book in for a free consultation either online or in your nearest branch. Please allow up to one hour for your consultation and have your room measurements with you. You will have a dedicated kitchen designer for your project who will create a design based on your ideas, your space and your budget. This will be followed by a quotation.

BOOK AN
APPOINTMENT

TALK TO YOUR BUILDER / TRADESPERSON

When it comes to a new kitchen, there are many things to consider, including structural changes, plumbing, updates to your electrics and decorating. Trade professionals have the craftsmanship and knowledge to fit kitchens to the highest standards, so we would always recommend confirming measurements and any other important considerations with your local tradesperson.

CONFIRM YOUR ORDER

When you are happy with the final design, its time for us to prepare your kitchen. There are 2 options depending on your preferred timeframe, you can choose: 1) Flatpack units or 2) SmartFit* units. A 3D design will be provided to you once your deposit has been received.

GET IT DELIVERED

If you have chosen option 1, you can pick up from your local warehouse. If you have chosen option 2, we can deliver to your chosen location where your kitchen arrives completely assembled. Delivery times for SmartFit kitchens start from 25 working days.

INSTALLATION

Whether it's your own builder or one of our approved fitters, they will be able to work from the 3D design that we have prepared for you. We are on hand to answer any questions you might have during the final stages of your build.

TOP 3 TIPS FOR DESIGNING A FUNCTIONAL KITCHEN LAYOUT

1. Prioritize the Kitchen Work Triangle

Keep the sink, hob, and fridge positioned in a practical triangle to minimize unnecessary movement and make cooking more efficient. Ideally, the distance between these key zones should feel natural—no more than a couple of paces apart. This setup reduces wasted steps and keeps everything within easy reach.

2. Maximize Space and Storage Thoughtfully

Use deep drawers, tall cabinets, and pull-out organizers to make the most of your storage. Don't be afraid to sacrifice awkward corners for more functional solutions like accessible drawers. Ensure there's at least 900mm of clearance around islands and walkways for comfortable movement—and more if accessibility is a concern.

3. Design with Real-Life Use in Mind

Start with accurate measurements and a clear understanding of how the space will be used. Think about how you cook, what appliances you use most, and how you move through the kitchen. Group related zones—like the sink, bin, and dishwasher—and always consider safety, ease of use, and natural light.

*WHY CHOOSE

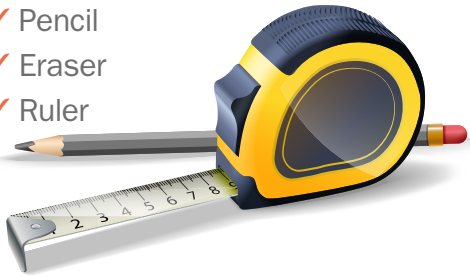

- Personalised delivery time scheduled (Morning or Afternoon) with our kitchen support team
- Your kitchen arrives completely preassembled, delivered by our drivers
- Installation is quick, clean and saves money on the additional labour costs of assembling on site
- Less packaging and cardboard waste than a flatpack kitchen
- Less mess and disruption on site in your home
- Reduces your kitchen installation time by up to 50%
- Last minute extras are available directly from your nearest branch

Steps to measure your kitchen

1 GATHER TOOLS:

- ✓ Tape measure
- ✓ Graph paper
- ✓ Pencil
- ✓ Eraser
- ✓ Ruler

4 MEASURE DOORS & WINDOWS

Measure the width and height of each door and window.

Note the distance from the floor to the bottom of the window and from the ceiling to the top of the window.

Measure the distance of each window or door to the nearest corner.

When measuring internal doors, measure from the outside of the architrave on the left and right of the door. If the architrave isn't fitted, let our designers know.

Mark these on your sketch.

2 SKETCH THE LAYOUT

Draw a rough outline of your kitchen on graph paper.

Include all walls, windows, doors, and any fixed features like radiators or columns.

5 MEASURE FIXED FEATURES

Measure the dimensions of any fixed features like radiators, columns, or built-in appliances.

Mark their positions and sizes on your sketch.

If an island includes power, measure the cable position to two walls at a right angle.

3 MEASURE THE WALLS

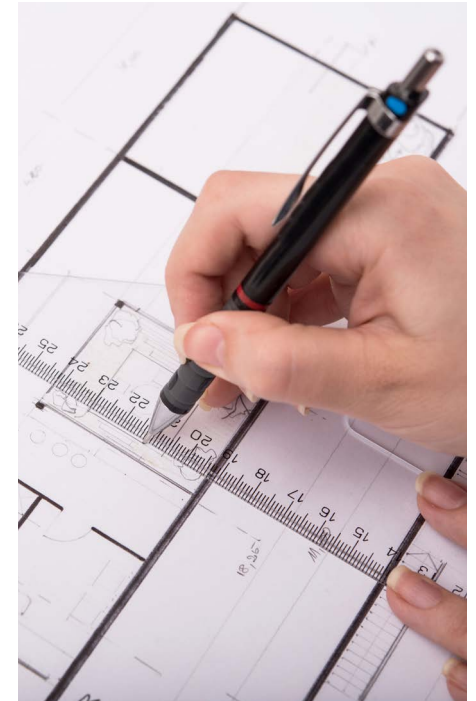

Measure the length of each wall from corner to corner.

Write down the measurements on your sketch.

If all measurements are correct, the walls should connect and complete in the final corner.

6 MEASURE CEILING HEIGHT

Measure the height from the floor to the ceiling at several points to account for any variations.

TIPS TO WATCH OUT FOR

Double-Check Measurements: Always measure twice to ensure accuracy.

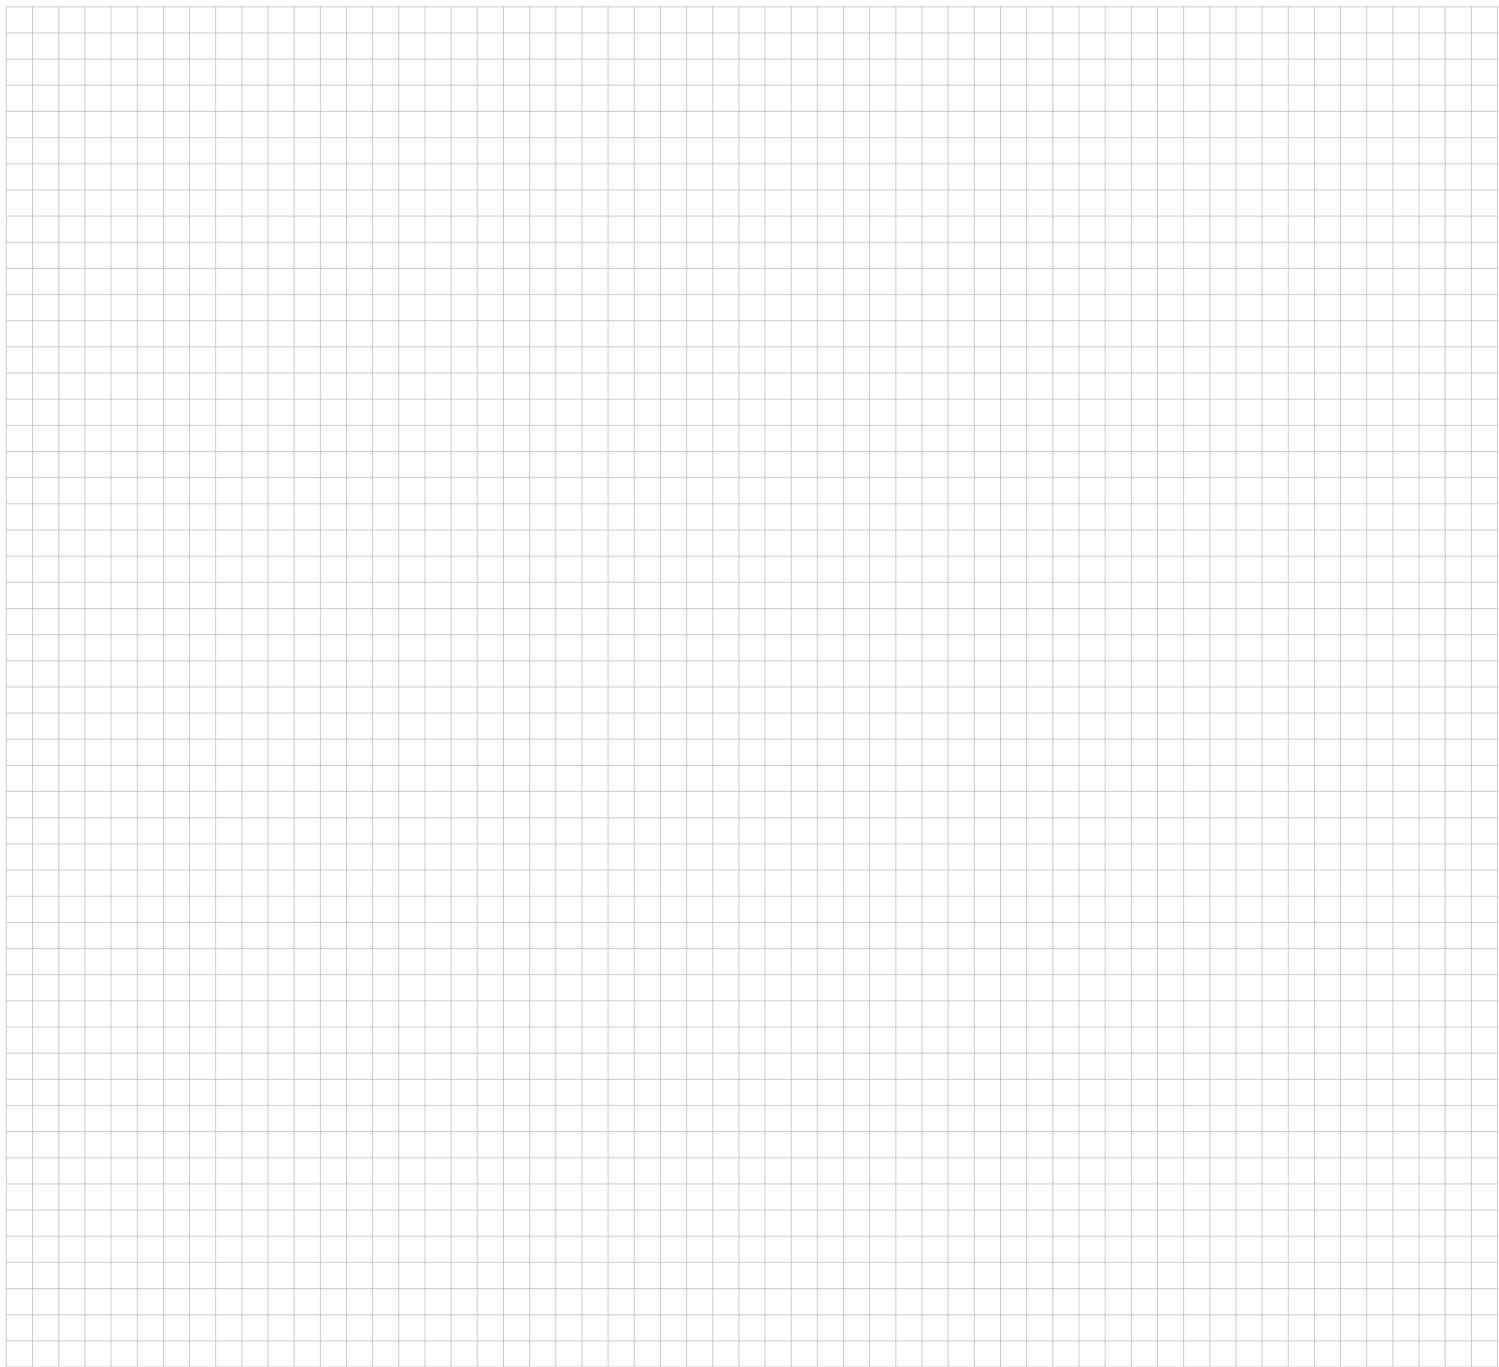

Account for Skirting Boards: Measure from the wall, not the skirting board.

Note Electrical Outlets and Plumbing: Mark the positions of electrical outlets, switches, and plumbing fixtures.

Consider Obstructions: Be aware of any obstructions that might affect the placement of cabinets or appliances.

Take Photos: Take some pictures on your mobile to share with our design team.

Existing Appliances: If you're keeping your existing appliances, take pictures of them and measure their height, width, and depth in millimetres.

Note: All measurements should be in millimetres (mm)

**GUIDELINE FOR MARKING
DIMENSIONS ON GRAPH PAPER**

Scale: Decide on a scale for your drawing (e.g., 1 square = 100 mm/10cm).

Outline: Draw the outline of your kitchen to scale on the graph paper.

Label: Clearly label each wall, door, window, and fixed feature with its corresponding measurement.

Details: Add details like the positions of electrical outlets, plumbing, and any other relevant features.

Review: Double-check your drawing and measurements for accuracy.

ASK THE EXPERTS

HOW TO CHOOSE THE RIGHT KITCHEN STYLE FOR YOU

1. Think About How You Live

Start by asking yourself a few key questions: Is your home modern or more traditional? Do you have a busy household with kids or pets? Is this your forever kitchen or a short-term upgrade? Your lifestyle plays a big role in choosing materials and finishes that will work for you day-to-day.

2. Explore What You Love

Look for inspiration—save photos of kitchens you like, browse showrooms, and notice what styles catch your eye. Do you prefer clean, modern lines or something more classic like a shaker style? Are you drawn to light, airy colours or bold, dramatic tones? Seeing real examples can help you discover your personal style.

3. Match Style with Budget and Practicality

Once you know what you like, it's time to balance that with what works for your space and budget. For example, if your kitchen sees a lot of action, durable finishes like PVC might be a smart choice. If you're after a high-end look, painted doors or custom details could be worth the investment. One of our designers can help guide you through the options that suit your style, needs, and budget—sometimes even suggesting ideas you hadn't considered.

Traditional Style

There are endless options for creating a timeless traditional kitchen with our exquisite range of shaker designs. Each piece in this collection showcases impeccable craftsmanship, quality, and personality, ensuring your kitchen exudes elegance and charm. Our traditional styles offer a wide selection of rich, luxurious colours, from painted ash charcoal to smooth painted matt white, allowing you to personalize your space to reflect your unique taste.

The impressive details in our shaker kitchens create the perfect balance of new and old, blending classic design elements with modern functionality. Intricate features such as faux in-frame styles, decorative mouldings, feature end panel options, and external plinths add depth and character, ensuring your kitchen stands the test of time.

Experience the harmonious blend of heritage and innovation with our traditional kitchen styles. These kitchens are not only beautiful but also built to last, providing a stunning focal point for your home for years to come. With assembled kitchens available for delivery in 6 to 8 weeks and stocked options for immediate collection, your dream kitchen is closer than you think.

Madison Cashmere: The Madison Cashmere combines the beauty of solid ash with a traditional design, offering a soft, luxurious finish.

Tulsa Ivory: The Tulsa Ivory combines warmth and tradition with its foil-wrapped five-piece shaker door, perfect for a cozy, inviting space.

ASK THE EXPERTS

HOW DO WE BALANCE STYLE AND FUNCTION IN YOUR KITCHEN?

1. Function Comes First

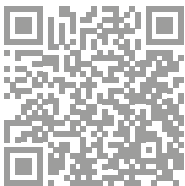

A beautiful kitchen still needs to work for your daily life. We start by planning a smart layout with clear zones for cooking, prepping, and cleaning. We make sure there's enough space to move comfortably, and that appliances and storage are placed where they make the most sense for how you use your kitchen.

2. Then We Make It Beautiful

Once the layout works, we focus on the look—choosing colours, finishes, and materials that reflect your style. Whether it's pairing dark doors with light worktops or keeping everything sleek and seamless, we make sure it all ties together visually.

3. Your Priorities Guide the Balance

Some clients prioritise premium finishes, while others want more built-in storage or clever features. We'll work with your budget and preferences to find the right mix—sometimes a small design tweak or material change can help you get both the look and function you want.

What Our
Clients Say

Ryan B

★★★★★

We dealt with Eamonn, absolutely great experience. Everything went exactly as discussed and he was quick to get back to any queries we had.

Magna Anthracite: The Magna Anthracite offers a bold, contemporary style with its handleless painted MDF door and J Pull profile handle built-in, ideal for a sophisticated kitchen.

Magna Green: The Magna Green brings a fresh, contemporary look with its handleless painted MDF door and J Pull profile handle built-in, ideal for a lively kitchen design.

WHAT ARE SOME COMMON MISTAKES TO AVOID WHEN DESIGNING A KITCHEN?

1. Poor Layout Planning

Avoid placing appliances too close together or in awkward spots—like hobs under windows or fridges in corners. Always allow enough clearance around islands, doors, and walkways so everything opens and functions properly.

2. Overlooking Practical Details

Skipping fillers, ignoring ceiling heights, or forgetting to check appliance sizes can lead to costly issues. Make sure drawers aren't placed under sinks, handles don't hit walls, and ventilation is considered.

3. Prioritising Style Over Function

It's easy to get caught up in looks, but too many storage gadgets in a small space or mismatched drawer lines can disrupt flow and usability. A well-balanced kitchen should look great and work effortlessly.

HOW TO CHOOSE THE RIGHT WORKTOP FOR YOUR KITCHEN

1. Start with Your Budget

Worktops range from cost-effective options like our Leading Edge collection to premium surfaces such as Silestone quartz or Dekton Porcelain. Knowing your budget helps us guide you to the best fit without compromising on style or quality.

2. Think About How You Use Your Kitchen

If you cook often, bake, or have a busy household, durability and heat resistance are key. Some materials are low-maintenance, while others require more care. Your lifestyle—and even your choice of sink—can influence the best worktop for your needs.

3. Match the Look to Your Kitchen Design

Your worktop should complement your door style, colour scheme, lighting, flooring, and layout. Whether you're going for sleek and modern or warm and classic, one of our designers can help you find a surface that ties it all together beautifully.

What Our Clients Say

Pat O'M

★★★★★

Recently purchased a kitchen from the Panelling Centre. They have a high quality showroom which initially gave me a good feel for the different options. I made an appointment with Ken and he was great start to finish.

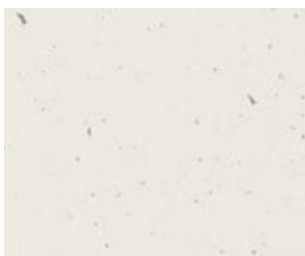

Worktops

Leading Edge

Using top quality laminate, each product showcases realistic prints using 'True Scale' patterns, that are digitally printed, and repeat every 2 metres. The high-pressure laminates are heat resistant up to 160°C (hot pots cannot be placed directly on to laminate surfaces).

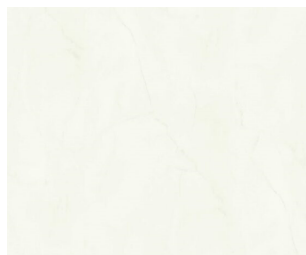

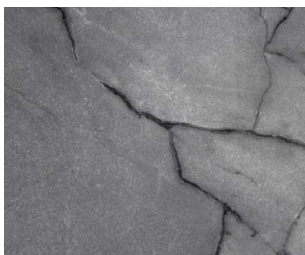

We also offer a bespoke made-to-order laminate worktop service, in a variety of sizes, thicknesses and shapes to suit your interiors – available in up to 4090mm long (depending on colour) and up to 1200mm wide. Worktops can also be finished to any size within the above dimensions and curved on 1 or all 4 corners.

Worktops

Post Form

The Mica Post Form worktop range of 38mm premium worktops has been designed to complement a variety of kitchen styles. Practical and durable, the Formocai® laminate range of worktops is produced with all the benefits you have come to expect from a quality manufacturer.

Postform worktops feature a seamless, rounded edge that not only looks sleek but also makes cleaning easier by preventing dirt and water from getting trapped in joints.

Silestone® by Cosentino

A leading brand for over 30 years that inspires designs for kitchens, bathrooms and home surfaces.

Silestone is a low-silica mineral surface composed of premium minerals and recycled materials.

Its revolutionary Hybriq+® technology effectively reduces crystalline silica content, resulting in an innovative, sustainable, and high-performance mineral surface.

In 2020 we launched our revolutionary technology Hybriq+®, that drastically reduces the content of crystalline silica in Silestone's composition, blending premium minerals with recycled materials to create a new product category: Hybriq+® Mineral Surfaces.

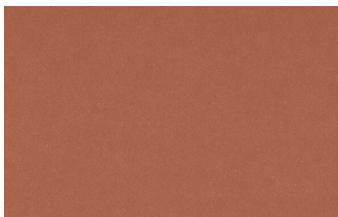

Hybriq+® Technology Features:

- Up to 10% and 40% of crystalline silica
- 99% Reused water
- 100% Renewable electric energy
- Minimum 20% recycled materials

Silestone advantages:

Silestone is extremely durable in kitchens, bathrooms and other spaces exposed to constant activity and use. In addition, it offers an unlimited range of colours and textures.

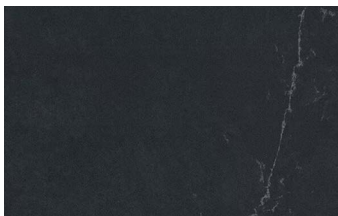

Silestone has many advantages, including minimal maintenance, high resistance to stains and scratches, and a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone the ideal solution for places where liquids are present. Silestone is resistant and allows for prolonged enjoyment to last a lifetime.”

The properties of Silestone are the result of constant years of innovation that guarantee maximum hygiene and safety.

Acid and Scratch Resistant:

Silestone has a high level of scratch and impact resistance, as well as resistance to external aggressors such as acids common in daily kitchen use.

Stain Resistance:

Silestone is a non-porous surface that is highly resistant to stains from coffee, wine, lemon juice, oil, vinegar, makeup and many other everyday products.

Impact Resistant:

The high impact resistance of Silestone allows the handling of hard objects (pots, pans, trays, etc.) with total peace of mind.

Surfaces with a 25-year warranty: Silestone surfaces offer a 25-year warranty, certified, written warranty.

Silestone Textures:

In order to adapt to all styles, Silestone offers different textures for any of its applications. Polished or Suede are three possibilities that make the imagination soar and bring to life countertops, floors or walls with the desired texture.

Polished: Extreme shine, a smooth surface to the touch and a uniform, intense and consistent colour.

Suede: Extra matte finish, offers a flat, non-rugged surface, which conveys a unique experience to the touch for its beauty and fineness."

Worktops

Dekton® by Cosentino

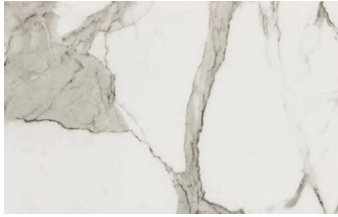

Dekton is a carbon neutral ultracompact porcelain surface with an optimised manufacturing process inspired by the beauty and aesthetics of natural stone that goes beyond nature, achieving the highest product performance.

Dekton is a sophisticated blend of over 20 minerals extracted from nature. Its production process is the result of years of research, development, and innovation in the manufacturing of glass, state-of-the-art porcelain and other surfaces.

Electron microscopy makes it possible to appreciate the reduced porosity of the material, a consequence of the sintering and ultracompaction process exclusive to Dekton. This reduced porosity and the absence of micro-defects causing stresses or weak points are the distinguishing features of Dekton.

- Low Water Absorption: Negligible, preventing expansion.
- UV Resistant: Does not fade or degrade outdoors.
- Mechanical Resistance: Suitable for wind and impact-prone applications.
- Fireproof: Withstands high temperatures without damage.
- Colour Durability: Consistent pigmentation, long-lasting.
- Scratch Resistant: Highly resistant to scratches.
- Dimensional Stability: Minimal expansion, thin joints remain stable.
- Freeze-Thaw Resistant: Performs well in various weather conditions.
- Abrasion Resistant: More resistant than granite and porcelain.
- Fire and Heat Resistant: Suitable for high-temperature areas.
- Easy Cleaning: Graffiti removable with standard products.
- Stain Resistant: Resists various stains without surface alteration.
- This makes Dekton an excellent choice for both interior and exterior projects, offering durability and low maintenance.

Stainless Steel Artinox

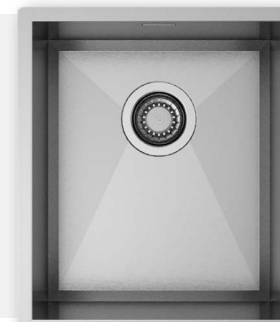

Artinox uses AISI 304 18/10 steel, an extremely high-performance metal which guarantees strength and durability in time. All stainless steel surfaces might be scratched. Solid sharp-edged objects or rough-bottomed pans may scratch. Never drag these on stainless steel surfaces. Never use abrasive powders, sponges or brillo pads to clean the surface. Metallic products, different from stainless steel left on the surface of sinks could cause an electro-chemical reaction thus damaging the surface. Avoid the use of bleach, ammonia, muriatic acid, hydrochloric acid, specific cleaners for silver, copper and aggressive chemicals in general.

Orion Wireworks

ASK THE EXPERTS

WHAT ARE THE BEST STORAGE SOLUTIONS FOR SMALL KITCHENS?

1. Make the Most of Corners

Corner spaces are often wasted—but not with smart solutions like Orion drawers, Nuvola pull-outs, magic corners, or carousel units. These make hard-to-reach areas easily accessible and functional.

2. Go Tall and Slim

Use your vertical space with tall larder units, overhead cabinets, and 150mm Base Larders for storing spices, oils, and dry goods. If ceiling height allows, extra-tall units can add valuable storage without taking up more floor space.

3. Choose Smart Drawers and Pull-Outs

Deep drawers, Hettich Internal Pantry Drawers, and pull-out baskets help keep everything organized and easy to reach. Even small tweaks—like converting the drawer under your oven into utensil storage—can make a big difference skipping storage. A well-designed kitchen should be both beautiful and practical.

Pull-Out Waste Solutions

These pull-out waste disposal units are the perfect solution to keeping the kitchen clean and tidy. The Rossi bins include fixed metal covers, with a soft close system and provide full extension runners.

Laundry Basket
for 400mm unit; 60litre basket

Fly Box Storage

Fly Box is an innovative corner cabinet solution where two compartments positioned one behind the other can be pulled out from the corner cabinet in a single movement. Thanks to its guide rail, the rear box positioned in the corner automatically folds out, allowing both compartments to be extended fully from the bottom cabinet. This special design optimises use of the storage space, and everything in the compartments can be reached simply and conveniently. Fly Box has a load-bearing capacity of 30 kg.

Hettich Bifold Door System

Bi-fold doors are an attractive alternative to standard cabinet doors. They are incredibly useful for high cabinets, replacing vertical lift panels which are often hard to reach, with a convenient sideways motion. Custom made to any size, this option is practical as well as stylish.

Interior Cabinets

If your tradesperson is building your kitchen for you, or if you enjoy making your own projects, then the flatpack program is ideal for you. These self assembly internal cabinets are available from stock, in 4 colour finishes: White, Robson Oak, Porcelain and Grey Linen.

Veneer-Wrapped MDF Acoustic Wall Panels

Elegant design. Superior sound control.

Upgrade your space with our premium acoustic panels, available in a range of stylish finishes. Each panel features fully wrapped wooden strips for a sleek, modern look and high acoustic performance. No painting or treatment is needed, and installation is quick using screws and adhesive. Panels can be easily cut to fit around fixtures like switches or thermostats. Each panel measures 2.4m in height and 600mm in width.

TIP: Use black screws to blend seamlessly into the acoustic backing.

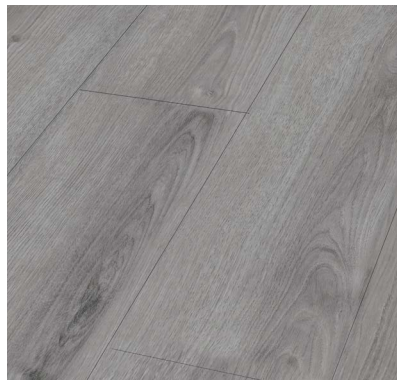

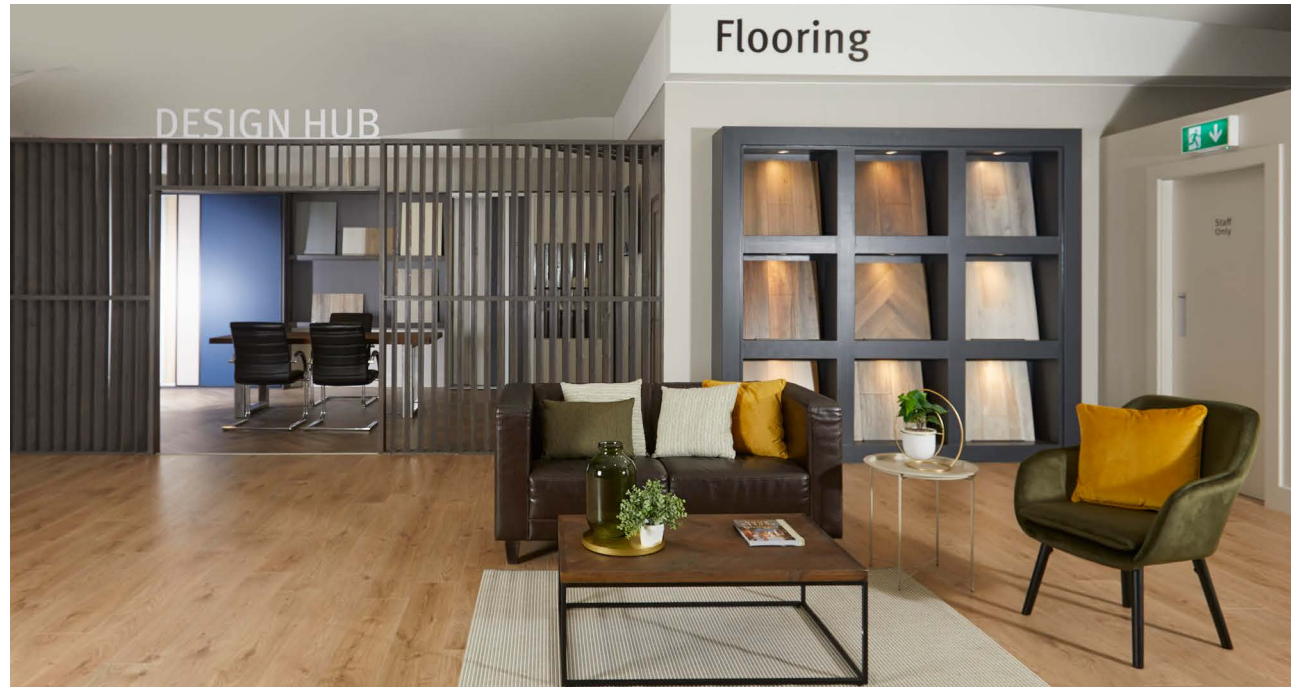

Perfect for residential, commercial, or hospitality interiors.

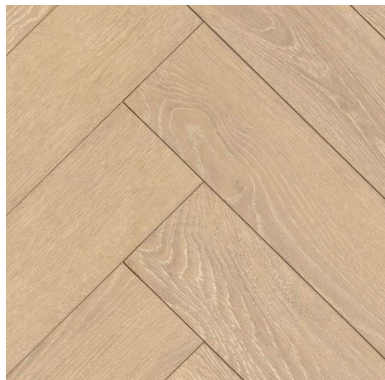

Laminate Flooring

The look and feel of high-quality laminate floors make them virtually indistinguishable from solid wood. Laminate flooring comes in various widths, lengths and thicknesses to suit all applications. Long plank formats with surrounding V-joint and nature-identical embossing are now especially desirable as they replicate genuine country house style plank floors more accurately than ever before.

There are a wide range of different decors to choose from to help you achieve your personal style. Whether you prefer classic oak, nature-identical wood styles or contemporary adaptations, there are virtually no limits to your individual creativity with this versatile floor covering. These floors are simple to install and hard-wearing.

ASK THE EXPERTS

TOP TIPS FOR DESIGNING YOUR DREAM KITCHEN

1. Design Around Your Daily Life

Think about how you use your kitchen—do you cook every day, entertain often, or need space for kids and pets? A great kitchen should support your lifestyle, not just look good.

2. Prioritise Function First, Then Style

Start with a layout that flows well and makes cooking, cleaning, and moving around easy. Once the space works, layer in your favourite colours, finishes, and features to reflect your personal style.

3. Make Smart Use of Space

In smaller kitchens, clever storage is key. Solutions like Orion drawers, Nuvola pull-outs, 150mm base larders, and Hettich internal pantry drawers help you stay organised without clutter.

4. Choose Materials That Match Your Needs

Love to cook? Consider Dekton Porcelain for heat resistance or Silestone quartz for durability. On a budget? Our Leading Edge collection offers stylish, practical options too.

5. Ask Yourself the Right Questions

What's not working in your current kitchen? What's on your wishlist? What's your budget and timeline? The more you know about what you want, the better your designer can bring it to life.

6. Avoid Common Pitfalls

Don't sacrifice function for looks. Avoid tight walkways, poor appliance placement, or skipping storage. A well-designed kitchen should be both beautiful and practical.
