Pilaster	1000 x 50 x 50mm
Plate Rack	310 x 1200mm

MORE

CARE & MAINTENANCE OF KITCHEN & WARDROBE DOORS

As with all timber based items our products should not be stored or installed in a newly plastered or damp environment.

To clean door surfaces use a soft clean cloth, 99 parts warm water to 1 part dish washing soap, dampen the cloth (not wet), wipe and dry with a soft clean cloth.

Do not use aggressive cleaning liquids - vinegar based detergents, solvents, abrasive detergents, alcohol, products with acid or alkali bases, white spirit or furniture polish.

Do not use items such as sponge scourers, abrasive items or dirty cloths.

Do not clean with steam or water vapour cleaners.

Do not allow water to settle on edges or corners, wipe and dry spills immediately with a soft clean cloth.

To avoid damage by excessive heat please follow these simple guidelines:

- When installing doors adjacent to ovens always ensure that doors are shielded by using heat deflector strips
- Never use any appliance which generates high levels of heat or concentrated steam (such as a toaster, kettle or pressure cooker) directly under or adjacent to a door or panel.

Gloss Colours

After removing the protective film please allow the surface to cure for seven days before cleaning or wiping.

Polishing Gloss finishes will leave minor scratches and polish marks, this is normal with this type of finish.
